Professional Summary

Computer Science undergraduate with experience in full-stack and backend development, specializing in scalable platforms, REST APIs, authentication, and real-time applications. Proficient in Python, JavaScript, Django, React, PostgreSQL, Docker, and cloud tools, with a strong foundation in data structures, algorithms, and system design.

Education

Gokaraju Rangaraju Institute of Engineering & Technology Aug 2023 – May 2027
B.Tech in Computer Science and Engineering - **CGPA : 8.84** Hyderabad, Telangana

Skills

Languages: Python, Java, C, JavaScript
Web Technologies: HTML, CSS, React.js, Redux, Tailwind CSS, Bootstrap, Django
Libraries & Frameworks: Leaflet.js, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch
Databases: SQL, PostgreSQL, SQLite, Prisma ORM
Developer Tools: VS Code, Git, GitHub, Jupyter Notebook, Postman, Docker

Experience

Springer Capital | ***Backend Web Developer Intern*** **Aug 2025 – Nov 2025**
Orion Advisor Technology (Django) *Remote*

- Built and maintained a Reports Service in Django to generate formatted **financial reports** over user-defined periods.
- Consumed internal **Orion Advisor Tech APIs** and transformed raw data into **structured outputs (PDF, CSV, JSON)** using Django utilities.
- Automated **email delivery** of reports, ensuring seamless distribution to users, and **containerized** the service with Docker for **portability** and **deployment**.

Impact: Streamlined reporting workflows, reduced manual effort by 40%, and enabled scalable delivery of 500+ reports per day across multiple formats.

Projects

Drivana Platform | Live Demo | *Django, React, Leaflet.js, DRF* **Jun 2025**

- Developed a fully responsive full-stack platform with **role-based authentication** for **Users**, **Drivers**, **Delivery Partners**, and **Restaurant Partners**.
- Deployed features for **vehicle booking**, **parcel delivery**, and **online food ordering**.
- Embedded **real-time location tracking** using **Leaflet.js** for map-based service coordination.

EV Route Finder | Live Demo | *React, Leaflet.js, TomTom API,Framer Motion, @react-three/fiber* **Aug 2025**

- Engineered a fully **responsive web application** to help EV users locate nearby charging stations and receive **real-time navigation**.
- Secured user access by implementing **multi-mode authentication** with **username** and **OTP**, allowing users to manage multiple contact methods.
- Integrated **TomTom API** and **Leaflet.js** for live **location tracking**, **traffic info**, and **turn-by-turn directions**.
- Built interactive 3D EV models using **@react-three/fiber** and animated UI with **Framer Motion**, while displaying smart routing info using **frontend-only logic** without a backend.

Certifyy-Hub | Live Demo | *Django, React, Django Rest Framework* **Jan 2026**

- Built a secure **certificate verification platform** allowing students to search and validate certificates via **unique IDs**, reducing manual verification by **80%**.
- Enabled **bulk Excel uploads** with automated validation to maintain **accurate and consistent certificate records**.
- Built an automated **certificate generation system** that fills details and creates **printable PDF certificates**.

Certifications

- Tata iQ – GenAI-Powered Data Analytics (Forage) – Completed AI-powered simulation for financial data analytics.
- IBM – Cloud Computing Essentials –Learned IaaS, PaaS, SaaS, and IBM Cloud tools.
- Cisco – Data Science Certification – Gained foundational skills in data science, analytics, and machine learning using Cisco resources.
